

Name of Dataset
1_F_electrolyzers_1992_2025
Version of Dataset
v1.0
Time Stap of Validation
26.02.2026 11:51:52

Template Type	OK
Type of data template (Dataset_RecordType) indicated: LIST	Warning
	Warning
Number of rows with text	4
Number of rows with data as indicated in cell I10 on the Cover Sheet: 159	Error
Number of rows with data as indicated on the Data Sheet: 159	

Table 1: Dataset Information

Dataset information			
		Property name	Dataset entries
1	Identification	dataset_id	auto
2		dataset_name	1_F_electrolyzers_1992_2025
3		dataset_version	v1.0
4	Grouping	datagroup_id	Flow
5		data_category	1
6		data_type	Flow
7	System location: What elements and objects in the system are described?	data_layer	Power generation capacity
8		process_scope	Flows into in-use stock
9		process_resolution	One aggregate sector
10		product_scope	Electrolyzers
11		product_resolution	AEL, PEMEL, SOEL, AEMEL
12		material_scope	none
13		material_resolution	none
14		regional_scope	EU+UK+EFTA
15		regional_resolution	Single countries
16		temporal_scope	1992 to 2025
17		temporal_resolution	Annual values
18	Description	description	Installed in-use capacity flow (in MW) for different water electrolyzer technologies, by EU single country, which are still in operation in year 2025
19		keywords	in-use stock, capacities; electrolyzers
20		data_provenance	Industry data
21		dataset_size	159 rows
22		comment	none
23	System location: Dataset aspects and semantics. For aspects: [Aspect;symbol;classification]. Mandatory aspects in gray shading.	aspect_1	technology
24		aspect_1_classification	100
25		aspect_2	commodity
26		aspect_2_classification	100
27		aspect_3	product_type
28		aspect_3_classification	100
29		aspect_4	region
30		aspect_4_classification	2
31		aspect_5	time
32		aspect_5_classification	3
33		aspect_6	organization
34		aspect_6_classification	92
35		aspect_7	none
36		aspect_7_classification	none
37		aspect_8	none
38		aspect_8_classification	none
39		aspect_9	none
40		aspect_9_classification	none
41		aspect_10	none
42		aspect_10_classification	none
43		aspect_11	none
44		aspect_11_classification	none
45		aspect_12	none
46		aspect_12_classification	none
47	Data access and licence	tupel_notation	Value(o,d,m,r,t)
48		semantic_string_example	In 1992 the swedish company Oskarshamn nuclear plant installed an alkaline electrolyzers (AEL) with a capacity of 0.7 MW, which is still in operation in year 2025.
49		semantic_string_general	[Layer] of [Data type] of [aspect3] flowing from [aspect1] to [aspect2] in [aspect4] in [aspect5] has [value].
50		type_of_source	Publicly available dataset, dynamic web page
51		project_license	miscellaneous licenses, see the comments in the dataset

52		main_author	See comment for each data entry
53		dataset_link	
54		dataset_format	Appendix. Supplementary materials
55		project_report	See comment for each data entry
56		suggested_citation	See comment for each data entry
57		visible	1
58	Data submission, review, and conversion info	access_date	19.12.2025
59		submission_date	tbd.
60		submitting_user	Tolga Kayabasi
61		dataset_conversion_info	
62		review_date	25.02.2026
63		review_user	Marcel Geller
64	Reserve	review_comment	
65		reserve1	
66		reserve2	
67		reserve3	
68		reserve4	
69		reserve5	

Table 2: Validation report for the data category, type, layer, and metadata

Cell	Name/label	Given Value/Text	Closest IEDC Match	Validation Report
D5	dataset_name	1_F_electrolyzers_1992_2025		No entry with dataset name 1_F_electrolyzers_1992_2025 were found in the IEDC database.
D6	dataset_version	v1.0		No entry with dataset name 1_F_electrolyzers_1992_2025 and version v1.0 were found in database. Please write 'none' if dataset is unique and does not have a version ID.
D8	data_category	Flow	Flow	The data category (ID: 1, name: Flow) of the dataset is valid.
D9	data_type	Flow	Flow	The data type (ID: 1, name: Flow) of the dataset is valid.
				The indicated data type fits to the indicated data category.
D10	data_layer	Power generation capacity	Power generation capacity	The data layer (ID: 8, name: Power generation capacity) of the dataset is valid.
D23	data_provenance	Industry data	Industry data	The data provenance (ID: 4, name: Industry data) of the dataset is valid.
D53	type_of_source	Publicly available dataset, dynamic web page	Publicly available dataset, dynamic web page	The data category (ID: 2, name: Publicly available dataset, dynamic web page) of the dataset is valid.
D54	project_license	miscellaneous licenses, see the comments in the dataset	miscellaneous licenses, see the comments in the dataset	The license provided for this dataset (ID: 19, name: miscellaneous licenses, see the comments in the dataset) of the dataset is valid.

Table 3: Validation report for the data aspects and their classifications

Aspect	Aspect Remarks	Classification	Classification Remarks	Dimension Remarks
aspect_1	aspect_1 provided for this dataset (aspect: technology, dimension: 6) is valid.	aspect_1_classification	aspect_1_classification provided for this dataset (classification_name: NZIA_final_products, dimension: 6) is valid.	The dimension 6 of aspect_1_classification provided for this dataset matches the classification of aspect_1 that exists.
aspect_2	aspect_2 provided for this dataset (aspect: commodity, dimension: 6) is valid.	aspect_2_classification	aspect_2_classification provided for this dataset (classification_name: NZIA_final_products, dimension: 6) is valid.	The dimension 6 of aspect_1_classification provided for this dataset matches the classification of aspect_1 that exists.
aspect_3	aspect_3 provided for this dataset (aspect: product_type, dimension: 6) is valid.	aspect_3_classification	aspect_3_classification provided for this dataset (classification_name: NZIA_final_products, dimension: 6) is valid.	The dimension 6 of aspect_1_classification provided for this dataset matches the classification of aspect_1 that exists.

aspect_4	aspect_4 provided for this dataset (aspect: region, dimension: 4) is valid.	aspect_4_classification	aspect_4_classification provided for this dataset (classification_name: regions_iso_iedc, dimension: 4) is valid.	The dimension 4 of aspect_4_classification provided for this dataset matches the classification of aspect_4 that exists.
aspect_5	aspect_5 provided for this dataset (aspect: time, dimension: 1) is valid.	aspect_5_classification	aspect_5_classification provided for this dataset (classification_name: time, dimension: 1) is valid.	The dimension 1 of aspect_5_classification provided for this dataset matches the classification of aspect_5 that exists.
aspect_6	aspect_6 provided for this dataset (aspect: organization, dimension: 7) is valid.	aspect_6_classification	aspect_6_classification provided for this dataset (classification_name: organization, dimension: 7) is valid.	The dimension 7 of aspect_6_classification provided for this dataset matches the classification of aspect_6 that exists.

Table 4: Use of consistent classifications

Line	Aspect	Given Value/Text	Remarks
------	--------	------------------	---------
