Table 2: Validation report for the data category, type, layer, and metadata

Cell	Name/label	Given Value/Text	Closest ledc Match	Validation Report
D5	dataset_name	3_LT_Vehicles_Baojun Tang_2019_China	3_LT_Vehicles_Baojun Tang_2019_China	1 entr(y/ies) with dataset name 3_LT_Vehicles_Baojun Tang_2019_China were found in the IEDC database.
D6	dataset_version	none	none	Entry with dataset name 3_LT_Vehicles_Baojun Tang_2019_China and version none is already in the database.
D8	data_category	Material/Product property	Material/Product property	The data category (ID: 3, name: Material/Product property) of the dataset is valid.
D9	data_type	Lifetime	Lifetime	The data type (ID: 5, name: Lifetime) of the dataset is valid.
				The indicated data type fits to the indicated data category.
D10	data_layer	Lifetime	Lifetime	The data layer (ID: 7, name: Lifetime) of the dataset is valid.
D23	data_provenance	Assumption based on compilation from scientific literature and expert estimates	Assumption based on compilation from scientific literature and expert estimates	The data provenance (ID: 13, name: Assumption based on compilation from scientific literature and expert estimates) of the dataset is valid.
D53	type_of_source	Proprietary report or research article	Proprietary report or research article	The data category (ID: 6, name: Proprietary report or research article) of the dataset is valid.
D54	project_license	unknown/not specified	unknown/not specified	The license provided for this dataset (ID: 1, name: unknown/not specified) of the dataset is valid.

Table 3: Validation report for the data aspects and their classifications

Aspect	Aspect Remarks	Classification	Classification Remarks	Dimension Remarks
aspect_1	aspect_1 provided for this dataset (aspect: commodity, dimension: 6) is valid.	aspect_1_classification	aspect_1_classification provided for this dataset (classification_name: general_product_categories, dimension: 6) is valid.	The dimension 6 of aspect_1_classification provided for this dataset matches the classification of aspect_1 that exists.
aspect_2	aspect_2 provided for this dataset (aspect: process, dimension: 7) is valid.	aspect_2_classification	aspect_2_classification provided for this dataset (classification_name: broad_industry_groups, dimension: 7) is valid.	The dimension 7 of aspect_2_classification provided for this dataset matches the classification of aspect_2 that exists.
aspect_3	aspect_3 provided for this dataset (aspect: region, dimension: 4) is valid.	aspect_3_classification	aspect_3_classification provided for this dataset (classification_name: regions_iso_iedc, dimension: 4) is valid.	The dimension 4 of aspect_3_classification provided for this dataset matches the classification of aspect_3 that exists.

aspect_4	aspect_4 provided for this dataset (aspect: age-cohort, dimension: 1) is valid.	aspect_4_classification	aspect_4_classification provided for this dataset (classification_name: time_ranges, dimension: 1) is valid.	The dimension 1 of aspect_4_classification provided for this dataset matches the classification of aspect_4 that exists.

Table 4: Use of consistent classifications

Line	Aspect	Given Value/Text	Remarks
A3	commodity	battery electric bus	ERROR:No exact match for label battery electric bus in classification commodity. Here are the 10 closest matches: passenger vehicle: battery electric vehicle; passenger car, battery electric; plug-in battery electric vehicle; diesel-powered bus; bus; small-size bus for own use; small-size bus for passengers; rigid bus; articulated bus; battery electric bus
A15	commodity	ship, liquefied natural gas	ERROR:No exact match for label ship, liquefied natural gas in classification commodity. Here are the 10 closest matches: truck (ordinary, gas-powered) for freight; truck (small, gas-powered) for freight; cargo ship; ship; ship, fuel oil; ship, dual fuel; ship, LNG; ship, modifiel fuel oil; container ship, fuel oil-powered; oil-fired gas turbine (SCGT)
	process		all labels could be matched to the selected classification for this aspect
	region		all labels could be matched to the selected classification for this aspect
	age-cohort		all labels could be matched to the selected classification for this aspect
	unit nominator		all units could be found in the units table
	unit denominator		all units could be found in the units table
