

Name of Dataset
6_PCF_DLS_by_Service_all_Countries_VELEZ_2026
Version of Dataset
none
Time Stap of Validation
26/02/2026 10:50:33

Template Type	OK
Type of data template (Dataset_RecordType) indicated: LIST	46
Number of rows with text	Warning
Number of rows with data as indicated in cell I10 on the Cover Sheet: 1938	0
Number of rows with data as indicated on the Data Sheet: 1938	Error
	11

Table 1: Dataset Information

Dataset information			
		Property name	Dataset entries
1	Identification	dataset_id	auto
2		dataset_name	6_PCF_DLS_by_Service_all_Countries_VELEZ_2026
3		dataset_version	none
4	Grouping	datagroup_id	30
5		data_category	6
6		data_type	Per capita flows
7	System location: What elements and objects in the system are described?	data_layer	Misc. physical units
8		process_scope	use phase
9		process_resolution	one aggregate process
10		product_scope	major goods and services needed for decent living
11		product_resolution	9 service categories (shelter, public, hygiene, education, communication, mobility, ...) and 13 product groups
12		material_scope	none
13		material_resolution	none
14		regional_scope	global
15		regional_resolution	176 individual countries
16		temporal_scope	2020-204
17		temporal_resolution	single scenario for the entire time period
18	Description	description	Country-level average annual per capita final consumption levels for providing a person with a decent living standard, by basic service category, as proposed by Vélez et al. (2026).
19		keywords	per capita; DLS; decent living standard; country; shelter; nutrition; mobility; education; healthcare; well-being; service provision; final demand;
20		data_provenance	Result of academic MFA work
21		dataset_size	1938
22	Data model for this dataset: Aspects, classifications, tuple notation, and semantic strings.	comment	Data cover service flows to people. Operational flows of final energy to generate the services (driving, thermal comfort) come in addition and are reported in the original supplementary file.
23		aspect_1	economic_indicator
24		aspect_1_classification	28
25		aspect_2	service
26		aspect_2_classification	12
27		aspect_3	commodity
28		aspect_3_classification	7
29		aspect_4	scenario
30		aspect_4_classification	8
31		aspect_5	time
32		aspect_5_classification	14
33		aspect_6	region
34		aspect_6_classification	2
35		aspect_7	none
36		aspect_7_classification	none
37		aspect_8	none
38		aspect_8_classification	none
39		aspect_9	none
40		aspect_9_classification	none
41		aspect_10	none
42		aspect_10_classification	none
43		aspect_11	none
44		aspect_11_classification	none
45		aspect_12	none
46		aspect_12_classification	none
47		tuple_notation	Value(E,V,g,S,t,r)
48		semantic_string_example	Annual average per capita flows for providing decent living standard in service category communication with commodity mobile phone in 2020-2040 in Brazil for scenario baseline is 0.34147 1/yr.

49		semantic_string_general	Annual average [Data type] for providing [Aspect 1] in service category [Aspect 2] with commodity [Aspect 3] in [Aspect 5] in [Aspect 6] for scenario [Aspect 4] is [Value].

Table 2: Validation report for the data category, type, layer, and metadata

Cell	Name/label	Given Value/Text	Closest IEDC Match	Validation Report
D5	dataset_name	6_PCF_DLS_by_Service_all_Countries_VELEZ_2026	6_PCF_DLS_by_Service_all_Countries_VELEZ_2026	1 entry(ies) with dataset name 6_PCF_DLS_by_Service_all_Countries_VELEZ_2026 were found in the IEDC database.
D6	dataset_version	none	none	Entry with dataset name 6_PCF_DLS_by_Service_all_Countries_VELEZ_2026 and version none is already in the database.
D8	data_category	General ratio	General ratio	The data category (ID: 6, name: General ratio) of the dataset is valid.
D9	data_type	Per capita flows	Per capita flows	The data type (ID: 16, name: Per capita flows) of the dataset is valid.
				The indicated data type fits to the indicated data category.
D10	data_layer	Misc. physical units	Misc. physical units	The data layer (ID: 17, name: Misc. physical units) of the dataset is valid.
D23	data_provenance	Result of academic MFA work	Result of academic MFA work	The data provenance (ID: 7, name: Result of academic MFA work) of the dataset is valid.
D53	type_of_source	Publicly available report or research article	Publicly available report or research article	The data category (ID: 5, name: Publicly available report or research article) of the dataset is valid.
D54	project_license	CC BY 4.0	CC BY 4.0	The license provided for this dataset (ID: 4, name: CC BY 4.0) of the dataset is valid.

Table 3: Validation report for the data aspects and their classifications

Aspect	Aspect Remarks	Classification	Classification Remarks	Dimension Remarks
aspect_1	aspect_1 provided for this dataset (aspect: economic_indicator, dimension: 10) is valid.	aspect_1_classification	aspect_1_classification provided for this dataset (classification_name: Economic_indicators, dimension: 10) is valid.	The dimension 10 of aspect_1_classification provided for this dataset matches the classification of aspect_1 that exists.
aspect_2	aspect_2 provided for this dataset (aspect: service, dimension: 11) is valid.	aspect_2_classification	aspect_2_classification provided for this dataset (classification_name: service_categories, dimension: 11) is valid.	The dimension 11 of aspect_2_classification provided for this dataset matches the classification of aspect_2 that exists.
aspect_3	aspect_3 provided for this dataset (aspect: commodity, dimension: 6) is valid.	aspect_3_classification	aspect_3_classification provided for this dataset (classification_name: general_product_categories, dimension: 6) is valid.	The dimension 6 of aspect_3_classification provided for this dataset matches the classification of aspect_3 that exists.

aspect_4	aspect_4 provided for this dataset (aspect: scenario, dimension: 9) is valid.	aspect_4_classification	aspect_4_classification provided for this dataset (classification_name: basic_scenario_alternatives, dimension: 9) is valid.	The dimension 9 of aspect_4_classification provided for this dataset matches the classification of aspect_4 that exists.
aspect_5	aspect_5 provided for this dataset (aspect: time, dimension: 1) is valid.	aspect_5_classification	aspect_5_classification provided for this dataset (classification_name: time_ranges, dimension: 1) is valid.	The dimension 1 of aspect_5_classification provided for this dataset matches the classification of aspect_5 that exists.
aspect_6	aspect_6 provided for this dataset (aspect: region, dimension: 4) is valid.	aspect_6_classification	aspect_6_classification provided for this dataset (classification_name: regions_iso_iedc, dimension: 4) is valid.	The dimension 4 of aspect_6_classification provided for this dataset matches the classification of aspect_6 that exists.

Table 4: Use of consistent classifications

Line	Aspect	Given Value/Text	Remarks
	economic_indicator		all labels could be matched to the selected classification for this aspect
	service		all labels could be matched to the selected classification for this aspect
	commodity		all labels could be matched to the selected classification for this aspect
	scenario		all labels could be matched to the selected classification for this aspect
	time		all labels could be matched to the selected classification for this aspect
F13 5	region	ROU	ERROR:No exact match for label ROU in classification region. Here are the 10 closest matches: ROU
F31 1	region	ROU	ERROR:No exact match for label ROU in classification region. Here are the 10 closest matches: ROU
F48 7	region	ROU	ERROR:No exact match for label ROU in classification region. Here are the 10 closest matches: ROU
F66 3	region	ROU	ERROR:No exact match for label ROU in classification region. Here are the 10 closest matches: ROU
F83 9	region	ROU	ERROR:No exact match for label ROU in classification region. Here are the 10 closest matches: ROU
